

Discover how your pharmacist can help you with chronic pain

The Opioid and Pain Management in Pharmacies Program (OPMPP) study will explore the benefits and feasibility of offering an opioid and chronic pain medication consultation service between the pharmacist and patient.

Why participate?

- You will receive up to 3 consultations with the pharmacist.
- You will also receive a thorough medication review along with a plan to optimize your medications and pain management to ensure you are getting safe and effective care.
- You will help to advance chronic pain research.

Who can participate?

- Adults 18 years of age or older
- Must have pain that lasts longer than 3 months AND/OR taking medication for pain for at least 3 months
- Currently taking or starting to take at least one medication that is an opioid (prescribed or behind the counter)
- Not an active client of secondary or tertiary care for pain (e.g., university hospital pain clinic, pain specialist)
